

2023 考研英语（二）真题及答案

Section I Use of English

Directions: Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on the ANSWER SHEET. (10 points)

Here's a common scenario that any number of entrepreneurs face today: you're the CEO of a small business and though you're making a nice 1, you need to find a way to take it to the next level. What you need to do is 2 growth by establishing a growth team. A growth team is made up of members from different departments within your company, and it harnesses the power of collaboration to focus 3 on finding ways to grow.

Let's look at a real-world 4. Prior to forming a growth team, the software company BitTorrent had 50 employees. Working in the 5 departments of engineering, marketing and product development. This brought them good results until 2012, when their growth plateaued. The 6 was that too many customers were using the basic, free version of their product. And 7 improvements to the premium, paid version, few people were making the upgrade.

Things changed, 8, when an innovative project marketing manager came aboard, 9 a growth team and sparked the kind of 10 perspective they needed. By looking at engineering issues from a marketing point of view, it became clear that the 11 of upgrades wasn't due to a quality issue. Most customers were simply unaware of the premium version and what it offered.

Armed with this 12, the marketing and engineering teams joined forces to raise awareness by prominently 13 the premium version to users of the free version. 14, upgrades skyrocketed, and revenue increased by 92 percent.

But in order for your growth team to succeed, it needs to have a strong leader. It needs someone who can 15 the interdisciplinary team and keep them on course for improvement. This leader will 16 the target area, set clear goals and establish a time frame for the 17 of these goals.

This growth leader is also 18 for keeping the team focus on moving forward and steer them clear of distractions. 19 attractive, new ideas can be distracting, the team leader must recognize when these ideas don't 20 the current goal and need to be put on the back burner.

Section II Reading Comprehension

Part A

Directions: Read the following four texts. Answer the questions after each text by choosing A, B, C or D. Mark your answers on the ANSWER SHEET. (40 points)

Text 1

In the quest for the perfect lawns, homeowners across the country are taking a shortcut -- and it is the environment that is paying the price. About eight million square meters of plastic grass is sold each year but oppositions has now spread to the highest gardening circles. The Chelsea Flower Show has banned fake grass from this year's event, declaiming it to be not part of its ethos. The Royal Horticultural Society (RHS), which norms the annual show in west London, says it has introduced the ban because of the damage plastic grass does to the environment and biodiversity.

Ed Horne of the RHS said: we launched our sustainability strategy last year and fake grass is just not in line with our ethos and views on plastic. We recommend using real grass because of its environment benefits, which include supporting wildlife, alleviating flooding and cooling the environment.

The RHS's decision comes as campaigners try to raise awareness of the problem fake grass cause. A Twitter account, which claims to "cut through the greenwash" of artificial grass, already has more than 20,000 followers. It is trying to encourage people to sign two petitions, one calling for a ban on the sale of plastic grass and another calling for an "ecological damage" tax on such lawns. They have gathered 7,276 and 11,282 signatures.

However, supporters of fake grass point out that there's also an environmental impact with natural lawns, which need mowing and therefore usually consume electricity or petrol. The industry also points out that real grass require considerable amounts of water, weed killer or other treatments and that people who lay fake grass tend to use their garden more. The industry also claims that people who lay fake grass spend on average of £500 trees or shrouds for their garden, which provides habitat for insects

21. The RHS thinks that plastic grass _____.
- A. is harmful to the environment
 - B. is a hot topic in gardening circles
 - C. is overpraised in the annual show
 - D. is ruining the view of west London.
22. The petitions mentioned in Paragraph 3 reveal the campaigners' _____.
- A. disappointment with RHS
 - B. resistance to fake grass use
 - C. anger over the proposed tax
 - D. concern above real grass supply
23. In Paragraph 4, supporters of fake grass point out _____.
- A. the necessity to lower the cost of fake grass
 - B. the disadvantages of growing real grass
 - C. the way to take care of artificial lawns
 - D. the challenges of insect habitat protection
24. What should the government do with regard to artificial grass?
- A. Urge legislation to restrict its use.
 - B. Take measures to guarantee its quality.
 - C. Remind its users to obey existing rules.
 - D. Replace it with sustainable alternatives.
25. It can be learned from the text that fake grass _____.
- A. is being improved continuously
 - B. has seen a market share decline
 - C. is becoming increasingly affordable
 - D. has been a controversial product

Text2

It's easy to dismiss as absurd the federal government's ideas for plugging the chronic funding gap of our national parks. Can anyone really think it's a good idea to allow Amazon deliveries to your tent in Yosemite or food trucks to line up under the redwood trees at Sequoia National Park?

But the government is right about one thing: U.S. national parks are in crisis. Collectively, they have a maintenance backlog of more than \$12 billion. Roads, trails, restrooms, visitor centers and other infrastructure are crumbling.

But privatizing and commercializing the campgrounds would not be a cure-all. Campgrounds are a tiny portion of the overall infrastructure backlog, and businesses in the parks hand over, on average, only about 5% of their revenues to the National Park Service.

Moreover, increased privatization would certainly undercut one of the major reasons why 300 million visitors come to the parks each year: to enjoy nature and get a break from the commercial drumbeat that overwhelms daily life.

The real problem is that the parks have been chronically starved of funding. An economic survey of 700 U.S. taxpayers found that people would be willing to pay a significant amount of money to make sure that parks and their programs are kept intact. Some 81% of responders said they would be willing to pay additional taxes for the next 10 years to avoid any cuts to national parks.

The national parks provide great value to U.S. residents both as places to escape and as symbols of nature. On top of this, they produce value from their extensive education programs, their positive impact on the climate through carbon sequestration, their contribution to our cultural and artistic life, and of course through tourism. The parks also help keep America's past alive, working with thousands of local jurisdictions around the country to protect historical sites and to bring the stories of these places to life.

The parks do all this on a shoestring. Congress allocates only \$3 billion a year to the national park system—an amount that has been flat since 2001 (in inflation-adjusted dollars) with the exception of a one-time boost in 2009. Meanwhile, the number of annual visitors has increased by more than 50% since 1980, and now stands at 330 million visitors per year.

26. What problem are U.S. national parks faced with?

- A. decline of business profits
- B. inadequate commercialization
- C. lack of transportation services
- D. poorly maintained infrastructure

27. Increased privatization of campgrounds may _____.

- A. spoil visitor experience
- B. help preserve nature
- C. bring operational pressure
- D. boost visitors to parks

28. According to paragraphs 5, most respondents in the survey would _____.

- A. go to the national parks on a regular basis
- B. advocate a bigger budget for the national parks
- C. agree to pay extra for the national parks
- D. support the national parks' recent reforms

29. The national parks are valuable in that they _____.

- A. lead the way in tourism
- B. have historical significance
- C. sponsor research on climate
- D. provide an income for the locals

30.It can be concluded from the text that the national park system _____.

- A.is able to cope with staff shortages
- B.is able to meet visitor' demands
- C.is in need of a new pricing policy
- D.is in need of a funding increase**

Text3

The Internet may be changing merely what we remember, not our capacity to do so, suggests Columbia University psychology professor Betsy Sparrow. In 2011, Sparrow led a study in which participants were asked to record 40 factoids in a computer (“an ostrich’s eye is bigger than its brain,” for example). Half of the participants were told the information would be erased, while the other half were told it would be saved. Guess what? The latter group made no effort to recall the information when quizzed on it later, because they knew they could find it on their computers. In the same study, a group was asked to remember both the information and the folders it was stored in. They didn’t remember the information, but they remembered how to find the folders. In other words, human memory is not deteriorating but “adapting to new communications technology,” Sparrow says.

In a very practical way, the Internet is becoming an external hard drive for our memories, a process known as “cognitive offloading.” Traditionally, this role was fulfilled by data banks, libraries, and other humans. Your father may never remember birthdays because your mother does, for instance. Some worry that this is having a destructive effect on society but Sparrow sees an upside. Perhaps, she suggests, the trend will change our approach to learning from a focus on individual facts and memorization to an emphasis on more conceptual thinking - something that is not available on the Internet. “I personally have never seen all that much intellectual value in memorizing things,” Sparrow says, adding that we have’t lost our ability to do it.

Still other experts say it’s too soon to understand how the Internet affects our brains. There is no experimental evidence showing that it interferes with our ability to focus, for instance, wrote psychologists Christopher Chabris and Daniel J. Simons. And surfing the web exercised the brain more than reading did among computer-savvy older adults in a 2008 study involving 24 participants at the Semel Institute for Neuroscience and Human Behavior at the University of California, Los Angeles.

“There may be costs associated with our increased reliance on the Internet, but I’d have to imagine that overall the benefits are going to outweigh those costs,” observes psychology professor Benjamin Storm. “It seems pretty clear that memory is changing, but is it changing for the better? At this point, we don’t know.”

31.Sparrow’s study shows that with the Internet, the human brain will _____.

- A.analyze information in detail
- B.collect information efficiently
- C.switch its focus of memory**
- D.extend its memory duration

32.The process of “cognitive offloading” _____.

- A.helps us identify false information
- B.keeps our memory from failing
- C.enables us to classify trivial facts
- D.lessens our memory burdens**

33.Which of the following would Sparrow support about the Internet?

- A.It may reform our learning approach.**
- B.It may impact our society negatively.
- C.It may enhance our adaptability to technology.
- D.It may interfere with our conceptual thinking.

34.It is indicated in Para. 3 that how the Internet affects our brains?

- A.requires further academic research**
- B.is most studied in older adults
- C.is reflected in our reading speed
- D.depends on our web-surfing habits

35.Neither Sparrow nor Storm would agree that _____.

- A.our reliance on the Internet will be costly
- B.the Internet is weakening our memory**
- C.memory exercise is a must for our brains
- D.our ability to focus declines with age

Text4

Teenagers are paradoxical. That's a mild and detached way of saying something that parents often express with considerably stronger language. But the paradox is scientific as well as personal. In adolescence, helpless and dependent children who have relied on grown-ups for just about everything become independent people who can take care of themselves and help each other. At the same time, once cheerful and compliant children become rebellious teenage risk-takers.

A new study published in the journal *Child Development* by Eveline Crone of the University of London and colleagues, suggests that the positive and negative sides of teenagers go hand in hand. The study is part of a new wave of thinking about adolescence. For a long time, scientists and policy makers concentrated on the idea that teenagers were a problem needed to be solved. The new work emphasizes that adolescence is a time of opportunity as well as risk.

The researchers studied "prosocial" and rebellious traits in more than 200 child and young adults, ranging from 11 to 28 years old. The participants filled out questions about how often they did things that were altruistic and positive, like sacrificing their own interests to help a friend or rebellious and negative, like getting drunk or staying out late.

Other studies have shown that rebellious behavior increased as you become a teenager and then fades away as you grow older. But the new study shows that, interestingly, the same pattern holds for prosocial

behavior .Teenagers were more likely than younger children or adults to report that they did things like selfishly help a friend.

Most significantly, there was a positive correlation between prosociality and rebelliousness. The teenagers who were more rebellious were also more likely to help others. The good and bad sides of adolescence seem to develop together.

Is there some common factor that underlies these apparently contradictory developments? One idea is that teenager behavior is related to what researchers call “reward sensitivity”. Decision-making always involves balancing rewards and risks, benefits and costs “Reward sensitivity” measures how much reward it takes to outweigh risk .

Teenagers are particularly sensitive to social rewards-winning the game, impressing a new friend, getting that boy to notice you. Reward sensitivity, like prosocial behavior and risk-taking, seems to go up in adolescence and then down again as we age. Somehow, when you hit 30, the chance that something exciting and new will happen at that party just doesn’t seem to outweigh the effort of getting up off the couch.

36. According to Paragraph 1, children growing into adolescence tend to _____.

- A. develop opposite personality traits
- B. see the world in an unreasonable way
- C. have found memories of their past
- D. show affection to their parents

37. It can be learned from Paragraph 2 that Crone’s study _____.

- A. explores teenagers’ social responsibilities
- B. examines teenagers’ emotional problems
- C. provides a new insight into adolescence
- D. highlights negative adolescent behavior

38. What does Crone’s study find about prosocial behavior?

- A. It results from the wish to cooperate
- B. It is cultivated through education
- C. It is subject to family influence
- D. It tends to peak in adolescence

39. It can be learned from the last two paragraphs that teenagers _____.

- A. over-stress their influence on others
- B. care a lot about social recognition
- C. become anxious about their future
- D. endeavor to live a joyful life

40. What is the text mainly about?

- A. Why teenagers are self-contradictory?

- B. Why teenagers are risk-sensitive?
- C. How teenagers develop their prosocial ability?
- D. How teenagers become independent?

Part B

Directions: Read the following text and answer the questions by choosing the most suitable subheading from the list A-G for each of the numbered paragraphs (41-45). There are two extra subheadings. Mark your answers on the ANSWER SHEET. (10 points)

- A. The rise of home prices is a temporary matter.
- B. Builders possibly need to submit new estimates of their projects.
- C. There will be specific limits on home extensions to prevent heat loss.
- D. The new rules will take home prices to an even higher level.
- E. Many people feel that home prices are already beyond what they can afford.
- F. The new rules will affect people whose home extensions include new windows and doors.
- G. The rule changes will benefit homeowners eventually.

Net-zero rules set to send cost of new homes and extensions soaring

New building regulations aimed at improving energy efficiency are set to increase the price of new homes, as well as those of extensions and loft conversions on existing ones.

The rules, which came into effect on Wednesday in England, are part of government plans to reduce the UK's carbon emissions to net zero by 2050. They set new standards for ventilation, energy efficiency and heating, and state that new residential buildings must have charging points for electric vehicles.

The moves are the most significant change to building regulations in years, and industry experts say they will inevitably lead to higher prices at a time when a shortage of materials and high labour costs are already driving up bills.

Brian Berry, chief executive of the Federation of Master Builders, says the measures will require new materials, testing methods, products and systems to be installed. "All this comes at an increased cost during a time when prices are already sky high. Inevitably, consumers will have to pay more," he says.

Gareth Belsham, of surveyors Naismiths, says people who are upgrading, or extending their home, will be directly affected. "The biggest changes relate to heating and insulation," he explains. "There are new rules concerning the amount of glazing used in extensions, and any new windows or doors must be highly insulated."

Windows and doors will have to adhere to higher standards, while there are new limits on the amount of glazing you can have to reduce unwanted heat from the sun.

Thomas Goodman, of MyJobQuote, says this will bring in new restrictions for

extensions. "Glazing on windows, doors and rooflights must cover no more than 25% of the floor area to prevent heat loss," he says.

As the rules came into effect last Wednesday, property developers were rushing to file plans just before the deadline. Any plans submitted before that date are considered to be under the previous rules, and can go ahead as long as work starts before 15 June next year.

Builders which have costed projects, but have not filed the paperwork, may need to go back and submit fresh estimates, says Marcus Jefford of Build Aviator.

Materials prices are already up 25% in the last two years. How much overall prices will increase as a result of the rule changes is not clear. "Whilst admirable in their intentions, they will add to the cost of housebuilding at a time when many already feel that they are priced out of homeownership," says Jonathan Rolande of the National Association of Property Buyers. "An average extension will probably see around £3,000 additional cost thanks to the new regs."

John Kelly, a construction lawyer at Freeths law firm, believes prices will eventually come down. But not in the immediate future. "As the marketplace adapts to the new requirements, and the technologies that support them, the scaling up of these technologies will eventually bring costs down, but in the short term, we will all have to pay the price of the necessary transition," he says.

However, the long-term effects of the changes will be more comfortable and energy-efficient homes, adds Andrew Mellor, of PRP architects. "Homeowners will probably recoup that cost over time in energy bill savings. It will obviously be very volatile at the moment, but they will have that benefit over time."

41. Brian Berry

D. The new rules will take home prices to an even higher level.

42. Gareth Belsham

F. The new rules will affect people whose home extensions include new windows and doors.

43. Marcus Jefford

B. Builders possibly need to submit new estimates of their projects.

44. John Kelly

A. The rise of house price is a temporary matter.

45. Andrew Mellor

G. The rule changes will benefit homeowners eventually.

Section III Translation

46. Directions: Translate the following text into Chinese. Write your translation on the

ANSWER SHEET. (15 points)

In the late 18th century, William Wordsworth became famous for his poems about nature. And he was one of the founders of a movement called Romanticism, which celebrated the wonders of the natural world.

Poetry is powerful. Its energy and rhythm can capture a reader, transport them to another world and make them see things differently. Through carefully selected words and phrases, poems can be dramatic, funny, beautiful, moving and inspiring.

No one knows for sure when poetry began but it has been around for thousands of years, even before people could write. It was a way to tell stories and pass down history. It is closely related to song and even when written it is usually created to be performed out loud. Poems really come to life when they are recited. This can also help with understanding them too, because the rhythm and sounds of the words become clearer.

18 世纪晚期，威廉·华兹华斯因其关于自然的诗而闻名。他是浪漫主义运动的创始人之一，该运动颂扬自然世界的奇迹。

诗歌是有力量的。它的能量和节奏可以吸引读者，把他们带到另一个世界，让他们以不同的方式看待事物。通过精心挑选的单词和短语，诗歌可以是戏剧性的、有趣的、美丽的、感人的和鼓舞人心的。

没有人确切地知道诗歌是什么时候开始的，但它已经存在了数千年，甚至在人们会写字之前。这是一种讲述故事和传承历史的方式。它与歌曲密切相关，即使是写出来的，也通常是为了大声表演而创作的。诗歌被朗诵时才真正生动起来。这也有助于理解它们，因为单词的节奏和发音变得更加清晰。

Section IV Writing

Part A

An art exhibition and a robot show are to be held on Sunday, and your friend David asks you which one he should go to. Write an email to

- 1) make a suggestion and
- 2) give your reason(s)

You should write about 100 words on the **ANSWER SHEET**.

Do not sign your own name at the end of the letter. Use “Li Ming” instead.

Do not write the address. (10 points)

Dear David,

I have received your email and learned about your dilemma. It's really difficult for one to choose between the art exhibition and the robot show. But as your friend, I believe that the robot show may be a better choice for you.

Firstly, since you're always enchanted by latest technologies and sophisticated devices, the art exhibition may not cheer you up so much as the robot show does. Secondly, from the brochure we know, a series of unprecedented applications of latest technology in household situations will be introduced during the show,

including the robot servant with in-built AI chips and the completely automated household kitchen with skillful robotic arms. Inquisitive as you are, you may never wait a second to witness how they work. Furthermore, I heard that the art exhibition will last for 5 days, so maybe it is wiser to attend the robot show this Sunday and put the trip to the art exhibition to next Tuesday.

I really hope my suggestions will be of some help to you. Wish you a nice trip this weekend!

Yours sincerely,
Li Ming

Part B

Directions:

Write an essay based on the following chart. In your essay, you should

- 1) interpret the chart, and
- 2) give your comments.

You should write about 150 words neatly on the ANSWER SHEET. (15 points)

2012年-2021年我国居民健康素养水平 (15-21年数据省略)

The line chart vividly depicts the change in Chinese residents' health literacy level from 2012 to 2021. Health literacy, which refers to people's ability to access basic healthcare information and services, and to promote their health condition based on them, seems to have a higher coverage than 10 years ago. The proportion of those with adequate health literacy among all residents aging from 15 to 69 has kept growing stably in the last decade. In 2012, the number was 8.8%, but when it comes to 2021, it reached 25.4%, which is a good news for all residents.

There are several factors contributing to the increasing health literacy level. First and foremost, the advance of technology ensures easier access to information for all residents. One decade ago, sending for a doctor appeared to be the only approach to gathering healthcare information, which was trustful, but took time and efforts. Now with the Internet pouring tons of information to our mobile phone every second, one can have a general idea about

his or her own physical condition merely through several clicks of online search. Secondly, Chinese residents are now taking a more scientific approach to healthcare. The practice of resorting to some elixirs sounds passe, and people are now increasingly aware of the significance of medical science. In other words, we are wiser.

To summarize, the rise in health literacy level seems to be an irreversible trend. With the advance of technology and efforts by the government, it is predictable that all residents, whether in urban or rural areas, will enjoy a healthier life in the future.
